Policy Updates

- Town Hall debrief:
 - \$38k is new university-wide 12-month minimum; **most SAS students years 1-3 already make more than that** when accounting for summer funding.
 - As is, the new university minimum **will not result in pay increases for SAS students years 1-3**, but will make a difference for years 4+ since **\$38k is minimum across 12 months**.
 - This is not the final word on this! **SAS-specific raises are being discussed** but Dean says no promises.
 - **Individual depts still have choice to distribute across 9, 10, or 12 months** as long as \$38k total.
 - SAS's budget is itself affected by inflation so **SAS cannot pledge to offset inflation**.
